Exam : **H12-723**

Title : HCIP-Security-CTSS(Huawei Certified ICT Professional - Constructing Terminal Security System)

Vendor : Huawei

Version : DEMO

NO.1 Deployed by an enterprise network manager Agile Controller-Campus with SACG Later; Identity authentication is successful but cannot access the post-authentication domain, This phenomenon may be caused by any reason? (Multiple choice)

- A. Agile Controller-Campus Wrong post-authentication domain resources are configured on the server.
- B. A serious violation will prohibit access to the post-authentication domain.
- C. The access control list of the post-authentication domain has not been delivered SACG.
- D. ALC The number of rules issued is too many, and a lot of time is required to match, causing interruption of access services.

Answer: A,B,C

NO.2 Regarding the application scenarios of Agile Controller-Campus centralized deployment and distributed deployment, which of the following options are correct? (Multiple select)

- A. If end users are scattered in different geographical locations, a distributed deployment solution is recommended.
- B. If most end users are concentrated on--Offices in several regions, and a small number of end users work in branches. Distributed deployment is recommended.
- C. If end users are scattered in different regions, a centralized deployment solution is recommended.
- D. If most end users work in one area and a few end users work in branch offices, centralized deployment is recommended.

Answer: A,D

NO.3 Wired 802.1X During authentication, if the access control equipment is deployed at the Jiangju layer, this deployment method has the characteristics of high security performance, multiple management equipment, and complex management.

- A. right
- B. wrong

Answer: B

NO.4 Which of the following options is not a challenge brought by mobile office?

- A. Users can access the network safely and quickly.
- B. Network gateway deployment
- C. The mobile office platform is safe and reliable and goes online quickly.
- D. Unified terminal management and fine control.

Answer: B

NO.5 Configuring WLAN device detection can realize the monitoring of the entire network, but you need to set the working mode of the AP first, which of the following options are. What is the working mode of AP? (multiple choice)

- A. Mixed mode
- B. Normal mode
- C. Monitoring mode
- D. access mode

Answer: B,C

NO.6 Identity authentication determines whether to allow access by identifying the identity of the access device or user.

A. wrong

B. right

Answer: B

NO.7 Which of the following options is not included in the mobile terminal life cycle?

A. deploy

B. Uninstall

C. run

D. Obtain

Answer: B

NO.8 Use on the terminal Portal The authentication is connected to the network, but you cannot jump to the authentication page. The possible reason does not include which of the following options?

A. CS Did not start

B. Agile Controller-Campus Configured on Portal The authentication parameters are inconsistent with the access control device.

C. When the page is customized, the preset template is used.

D. Access device Portal The authentication port number of the template configuration is 50100 ,Agile Controlle-Campus The above is the default.

Answer: C

NO.9 There are three roles in the XMPP protocol: server, gateway, and client. Corresponding to the free mobility solution: Agile Controller-Campus as For the server, Huawei USG6000 series firewall acts as the gateway; the agile switch acts as the client.

A. right

B. wrong

Answer: B

NO.10 In the scenario of SACG linkage in bypass mode, only the traffic initiated by the terminal user will pass through the firewall, and the server will return to the terminal in use.

The traffic does not need to go through the firewall y. For the firewall, it belongs to the scenario of inconsistent traffic back and forth paths, this needs to turn off the session state check function.

A. right

B. wrong

Answer: A

NO.11 BY00 The products and textiles provided by the history solution program cover the entire terminal network\Application and management and other fields/include: Serialization BC Equipment, paperless network system network access support, VPN Gateway, terminal security customer ladder

software, authentication system, mobile device management(MDN),move eSpace UC.

A. wrong

B. right

Answer: B

NO.12 Traditional network single--The strategy is difficult to cope with the current complex situations such as diversified users, diversified locations, diversified terminals, diversified applications, and insecure experience.

A. wrong

B. right

Answer: B

NO.13 WEB filtering technology is a kind of in-depth testing for WEB loophole, WEB classification and access control security management technology on the Internet.

A. TRUE

B. FALSE

Answer: A

NO.14 What are the three main steps of business free deployment? (Multiple choice)

A. The system runs automatically

B. Define and deploy group policies

C. Security group reported by the system

D. Define security group

E. Define user groups

Answer: A,B,D

NO.15 Security zone division means to better protect the internal network security,Based on the business type and security requirements of the intranet, divide the intranet into several granularities. Logical area. Which of the following options does not belong Agile Controller-Campus Security domain?

A. Business domain:

B. User domain

C. Network domain

D. Attack domain

Answer: D
