Free Download Demo

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

Topping Certification Exam Prep, Test Dumps Materials - ActualTestsIT

Exam : **H31-411**

Title : **HCIA-LTE V1.0**

Vendor : **Huawei**

Version : **DEMO**

NO.1 About the description of the gateway selection in EPC, which of the following are correct?
(Multiple Choice)

- A. MME select S-GW according to the UE's current TAI
- B. In the process of Attach, select S-GW using the DNS parse function based on TAI
- C. Should try to choose the P-GW unity with the selected S-GW
- D. If UEA activates multiple PDN connections to a APN, these PDN connections can choose different PGW

Answer: ABC

NO.2 The UBBP board supports reuse of baseband resources between systems to achieve multi-system concurrency.

- A. True
- B. False

Answer: A

NO.3 In the following types of inter-station handovers, what type of handover is required to use the same MME?

- A. S1 handover
- B. X2 handover
- C. LT&GRAN handover
- D. LTE&UMTS handover

Answer: B

NO.4 Which of the following is the data configuration tool for the LTE system?

- A. OM-Star
- B. Site Deployment
- C. CME
- D. DHCP tool

Answer: C

NO.5 Which of the following modules does the AAU function module include? (Multiple Choice)

- A. RU
- B. CU
- C. AU
- D. Power Module

Answer: A,C,D

NO.6 Which sub-functions are the RF subsystem functions included in the following? (Multiple Choice)

- A. Complete the send and receive processing functions of the wireless signal
- B. Complete uplink and downlink baseband data processing functions
- C. Provide interface of base station and antenna system
- D. Provide interface of base station and the external clock source

Answer: AC

NO.7 The installation position of the GPS antenna to broaden its view of the sky, no tall buildings around. GPS antenna upright angle should not be less than 90?

- A. True
- B. False

Answer: A

NO.8 The near-end commissioning internet access on the UMPT is USB, the insert cable is connected to the commissioning terminal.

- A. True
- B. False

Answer: A

NO.9 Which of the following does mark the identifying of the user PDN connection include in LTE/EPC network? (Multiple Choice)

- A. TEID
- B. UEIP
- C. APN
- D. GUTI

Answer: BC

NO.10 Which of the following interface is used to connect between eNodeB?

- A. Iub
- B. S1
- C. X2
- D. S5

Answer: C

NO.11 Which of the following features are included by eNodeB? (Multiple Choice)

- A. Wireless resource management related functions, including wireless load control, admission control, connection mobility management, uplink/downlink dynamic resource allocation/scheduling, etc
- B. UE attachment MME option
- C. Configuration of measurement and measurement report
- D. Idle state mobility management

Answer: ABC

NO.12 In LTE, which of the following physical channels are the BCCH mapped to? (Multiple Choice)

- A. PDSCH
- B. PBCH
- C. PDCCH
- D. BCH

Answer: AB

NO.13 Which of the following is the interface between 3GPP R8 and the later SGSN and MME?

- A. S6a
- B. S3
- C. S4
- D. S12

Answer: B

NO.14 PUCCH is used to carry uplink scheduling request information to the eNodeB.

- A. True
- B. False

Answer: A

NO.15 Which of the following downlink physical channel is used to carry HARQ information?

- A. PHICH
- B. PCRBH
- C. PDSCH
- D. PDCCH

Answer: A

NO.16 LTE inter-frequency handoff can be based on which of the following events? (Multiple Choice)

- A. A3
- B. A4
- C. A5
- D. B1

Answer: ABC

NO.17 When expanding CP, 1 PRB contains 84 symbols.

- A. True
- B. False

Answer: B

NO.18 If negotiation mode of UMPT single board FE/GE optical interface on both ends are inconsistent, the optical interface may be down, after a period will resume for auto-negotiation.

- A. True
- B. False

Answer: B

NO.19 Which of the following transport channels are mapped to the PCCH channel?

- A. BCH
- B. PCH
- C. DL-SCH

D. UL-SCH

Answer: B

NO.20 An EPS bearer QCI = 4, which of the following statement is correct? (Multiple Choice)

A. This is a default bearer

B. This is a proprietary bearer

C. This is a Non-GBR bearer

D. This is a GBR bearer

Answer: BD

NO.21 UE has signed two APN, which APN-1 in the HSS signed APN-AMBR is 2Mbps, APN-2 signed APN-AMBR is 4Mbps, while UE signed UE-AMBR is 7Mbps, UE currently use APN-1 to activity 2 carriers, use APN-2 to activity a default bearer, which of the following is the operative UE-AMBR?

A. 8Mbps

B. 7Mbps

C. 4Mbps

D. 6Mbps

Answer: D

NO.22 Which of the following radio bearer is used to carry RRC messages and mapped to the CCCH?

A. SRB0

B. SRB1

C. SRB2

D. MIB

Answer: A

NO.23 Which of the following description about TA List is not correct?

A. Network to the user paging will work all TA in the TA list

B. Reasonable TA List distribution mode and design method can effectively reduce the probability of TAU, improve resource utilization

C. TA List can in the process of attachment, TAU or GUTI reallocation, allocated by the ENODEB to UE

D. For UE registered tracking area, if in the same TA List, by the same MME to provide services to reduce update signaling

Answer: C

NO.24 Which gain of MIMO can increase the peak rate of the UE?

A. Array gain

B. Diversity gain

C. Spatial multiplexing gain

D. Interference suppression gain

Answer: C

NO.25 The UE may periodically send the SRS within a specified bandwidth, and the SRS may be a

broadband mode or a frequency hopping mode.

- A. True
- B. False

Answer: A

NO.26 All versions of Huawei base station support multiple RRU merger cell, also support cross LBBP (LTE BaseBand Processing board type d) merger.

- A. True
- B. False

Answer: B

NO.27 In DBS3900, which of the following single board can provides alarm monitoring interface?

- A. UELP
- B. UPEU
- C. LMPT
- D. UTRP

Answer: B

NO.28 In the following types of handover, which of the following need the core network to participate?

(Multiple Choice)

- A. eNodeB handover within the station
- B. X2 port switch among eNodeB
- C. S1 port switch among eNodeB
- D. Cross-MME handover

Answer: BCD

NO.29 Which of the following is the main role of the GP in the LTE special subframe?

- A. Fighting inter-cell interference
- B. Can resist the ISI and ICI that brought by multipath
- C. Avoid interference between the uplink and downlink
- D. Can reduce PAR

Answer: C

NO.30 The VLAN configuration used by the service plane of the eNodeB is incorrect, will not cause SCTPLNK failure.

- A. True
- B. False

Answer: B

NO.31 Which of the following statements about the power control in the LTE system are correct?
(Multiple choice)

- A. Power control can improve coverage and capacity

- B.** Power control is one of the functions at the MAC layer
- C.** The purpose of power control is to save energy
- D.** Power control is to ensure the quality of service

Answer: ACD
